25/04/2024
REPO: https://github.com/davidlinyh/CITS5505-project

The final idea: UWA Students/Staff Lost and found platform

Features and priority:

- Login feature (authentication with other platforms) - 1
- User management (create account, edit, etc) - 2
- Lost item posting (have a tag field) by admin - 3
- Landing page(display a gallery of missing items)(filter by tags) - 4
- Bigger item description when an item is clicked on - 5
- Request for claim - 6
- Admin portal - we(the team) are admins (approve/deny requests) - 7
- History page (claimed items show up here) - optional
- Reputation - optional
- Report (certain number of strikes, block/delete user) - optional
- Search for items using tags - optional

Pages:
1. Register/create account - David.
2. Login - David.
3. Manage account (photo, address, edit details, delete account) - Ammad.
4. Gallery - Ammad.
5. Item description.
6. Claim Form (pop-up/section).
7. Admin portal (make post and request/sort requests by item identifier).

Note: Login page should have a message for visitors (non-uwa people) to visit the guild.
Certain Use case:
1. Student A finds a wallet.
2. They submit the wallet to the UWA guild(Admin)
3. Guild (Admin) creates post.
4. Owner create account.
5. Owner login.
6. Owner submit request/claim.
7. Guild (admin)validates claim request.
8. Guild (admin)approves the request.
9. An automated email is sent to the owner.

Initial deadlines:
Database: deadline - 28/04/24
Ida & Adharsh
Front End: deadline - 05/05/24
David & Ammad
